<b>Measure ID</b>	23
<b>Measure Title</b>	SPECT-MPI study clinical utilization of Attenuation Correction image acquisition
<b>Measure Description</b>	Percentage of Single Photon Emission Computed Tomography (SPECT) Myocardial Perfusion Imaging (MPI) studies using Attenuation Correction.
<b>Numerator</b>	Number of denominator eligible studies performed where an Attenuation Correction of CT or Transmission was used or an Attenuation Correction of "Prone" was documented for patients.
<b>Numerator Exclusions</b>	None
<b>Denominator</b>	Number of SPECT-MPI studies performed.
<b>Denominator Exclusions</b>	None
<b>Denominator Exceptions</b>	None
<b>NQS Domain</b>	Efficiency and Cost Reduction
<b>Outcome or High Priority</b>	High Priority
<b>Measure Type</b>	Process
<b>Inverse Measure</b>	No
